*APY = Annual Percentage Yield. Dividends are determined based on a tiered rate method. This means that the interest rate paid on the entire balance in your money market account will be determined by the tier in which your current balance resides. Dividends are calculated by the daily balance method and credited on the last day of each month. Rates are variable and may change after the account is opened. Rate is as of November 6th, 2025.

Federally Insured by NCUA
